Dear Helen,

Re NYM/2017/0222/FL

I am really sorry that I have not provided the information that would clarify my intent with the proposal.

I totally agree that stormproof windows would not be appropriate and it was my intent to supply the windows as flush casement in white foiled PVC with mechanical joints, to provide a close match to the appearance of timber windows.

The proposal is based on the window designs and opening positions being the same as the existing windows. Profile sections would be carefully selected to replicate as close as possible the existing. The main difference is that the employer wishes to omit the leads, however if this is a problem, this can be reviewed.

In other words, the proposal would look like the photographs already submitted but hopefully without the leads.

Please find attached two photos of a mechanical joint to an outer frame.

Hope this is in order and I again apologise for not making things as clear as I probably could have.

Assuring you of my best attention at all times.

Regards

Alan Walker
