Subject: RE: Arqiva Site, The Howe, Danby Low Moor, Castleton, - NYM/2017/0233/FL

Importance: High

Dear Hilary - This application seems to show a considerable enlargement of the footprint of the site and a new access route which may impact on the known and buried archaeology of the site. This requires the full condition: 1) to ensure that the surrounding area & access route are carefully examined in advance of the start of the development to identify, locate and clearly mark-out all upstanding remains in the vicinity that could be threatened by damage or erosion and which must be carefully avoided, and 2) to ensure that new ground disturbance is subject to an archaeological watching brief to ensure that any features or finds which are uncovered are adequately recorded.

Thanks
Graham
