Dear Planning Meeting,

This is a letter to oppose the planning application of Sirius Minerals section 73 which involve changes to the original planning consent.

I was appalled by the decision to consent to the mine at Doves Nest Farm. The scars on the landscape can be seen for miles and the extra traffic and pollution will not be good for our flora and fauna.

So to add to 'it all can not be right, Our National Parks are our heritage to be for our children. We don't 'own' land we just look after it and in this case we have not looked after it at all. So please do not make it worse. Money is not everything.

yours faithfully
