Dear Rob Smith

Thank you for the letter of 12 October inviting comment from the Health and Safety Executive on the application for variation of condition 5 of planning permission NYM/2014/0676/MEIA.

Having examined the submission, I conclude that in mining engineering terms the proposed changes are minor and there are no matters which appear to impact adversely on the health and safety of the workforce, or to members of the public.

The HSE therefore has **no objection** to the proposals.

Yours sincerely,

JR Leeming
HM Chief Inspector of Mines
Health and Safety Executive
