Note to the Planning Officer:

In assessing the submitted proposals and reaching its recommendation the Local Highway Authority has taken into account the following matters:

The design standard for the visibility splay at the access is Manual for Streets. The required visibility splay taken from a point 2.4 metres back from the kerbline. However, as the footway width is 2.9 metres, the available visibility is more than adequate. The Highway Authority can confirm that the work to construct the access was done with a Highway Licence but the footway reinstatement at the foot of the new brick wall still needs to be completed.

There are **no local highway authority objections** to the development.
