re planning application NYM2018/0094/FL

I would like to object to the proposed siting of this sculpture within Dalby Forest.

Whilst the concept of the project is to be applauded, this is surely the wrong location for the piece.

Its location would simply add to an already congested part of the forest, leading to a detrimental impact on the well-being of local residents - surely a key element of any planning proposal?

There are must myriad other spots in the forest where this sculpture could be located - which would both allow people to view it but also maintain the equilibrium of those already having to absorb the impact of large numbers of visiitors?

Yours,  
Andrew Morgan
