28/3/2018

Dear Sir / Madam,

**Applicant: The Secretary of State for the Home Department**

**Site Name: Cockmoor Road**

**Re: Proposed Installation of Telecommunications Mast at Cockmoor Road, Troutdale, North Yorkshire YO13 9EG (NGR: E: 492865, N: 487923)**

This is a full planning application under The Town and Country Planning Act 1990 and the Planning (Listed Buildings and Conservation Areas) Act 1990. It is also a notice in accordance with the electronic communications code as amended.

The Emergency Services currently use a mobile radio system (Airwave) to communicate but this needs replacement as the technology cannot deliver broadband data services. The Emergency Services Mobile Communications Programme (ESMCP) is the Home Office led programme responsible for replacing Airwave. It aims to provide an integrated voice and broadband data communications service for the Emergency Services (3ES: Police, Fire & Rescue and Ambulance Services). This Emergency Services Network (ESN) has initially been deployed by enhancing an existing commercial network configured to give the 3ES priority over other users. This proposal, as a component of the ESN, is for the Extended Area Services (EAS) which is to provide additional infrastructure to extend the ESN into primarily remote and commercially unviable areas where little or no mobile network coverage exists. This proposal forms part of the nation's Critical National Infrastructure.

This planning application pack comprises of the following documents:

- The completed planning application forms and relevant landownership certificates;
- Planning Drawings and Maps:
  - Drawing Number 101C- Site Location Maps;
  - Drawing Number 103C- Site Layout;
  - Drawing Number 104C- Proposed Elevation;
- ICNIRP Conformity Certificate;
- Technical Justification;

- Detailed Supporting Statement;
- Copy of Notice served;
- Payment of £462 to be made by telephone.

The enclosed application is identified as being the most suitable option and design that balances the Applicant's operational need with local and national planning policy and guidance. Due to the nature of the proposal we wish to avoid pre-commencement conditions wherever possible. We would ask the officer to contact us if any further details are required.

This application has been prepared in accordance with the Code of Best Practice on Mobile Network Development (November 2016).

Finally, as this proposal forms part of the nation's Critical National Infrastructure, for the new Emergency Services Network, a speedy determination of this application would be very much appreciated.

We look forward to receiving your acknowledgement and decision in due course.

Yours faithfully,

**ALISON HUGHES MRTPI**
