**DESIGN AND ACCESS STATEMENT**  
**FOR**  
**PAVING, DRAINAGE AND CHURCHYARD FOOTPATH WORKS**  
**AT**  
**ST. MARGARET'S CHURCH, AISLABY**

**NYMNPA**  
**- 6 JUL 2007**

**INTRODUCTION**

The proposals are intended to produce a stable, permanent pavement to the existing footpaths in the immediate vicinity of the church building, and safe, easily accessible pathways in the churchyard to the south. The proposals are also intended to mitigate the effects of surface water flooding which occurs when the public highway drains surcharge.

**DESIGN**

The design, incorporating traditional cobbles, is sympathetic to the church and surroundings and is functional. The design of the plastic cell pathways allows the growth of grass and is therefore suitably informal in appearance.

**ACCESS**

The whole scheme is intended to allow safer access to the churchyard areas.
