Design and Access Statement.

The existing roof on the conservatory is triple layer polycarbonate plastic of a pale blue colour.

This has never been satisfactory for the following reasons.

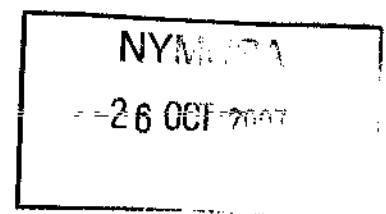

1. It has leaked since shortly after its construction.
2. In spite of it being triple glazed the heat loss is tremendous.
3. We feel that a conventional style roof to match the rest of the building will be more in keeping with the area.

~~We are therefore proposing to remove the above and replace it~~
with a conventional roof finished with Gaelic Pantiles and half round black plastic gutter both will match with the rest of the house.

Within the roof will be 3 Velux windows to give light to the conservatory and lounge. These windows will be finished in white, again to match the existing finishes.

The 300mm height of extra brickwork to be finished with pebble dashing to match the house.

There will be no change to the access.

~~There is no public access to the property from the road and the property is surrounded by a high wall, so it will be necessary to notify us should a visit be needed.~~
