

PROPOSED PLAN
Scale 1:1000
0 10 20 metres

- Key**
- Roadways in the main car park, bus circulating area and disabled parking bays. Bituminous carriageway surface.
 - Parking bays in the main car park and roadways. Recycled polyethylene grid with gravel in fill. Bays to be delineated with white inserts.
 - Roadway edges in the main car park and roadways. Grey granite setts laid at 45°.
 - Bus boarding kerbs. Pre-cast concrete raised kerbs to provide level boarding.
 - Pedestrian walkways and bus waiting area. Sealed gravel aggregate surfacing.
 - Tactile paving, grey coloured pre-cast concrete 400 x 400mm slabs.
 - Overhead parking area and balancing pond access route. Grass reinforced with recycled polyethylene mesh.
 - Internal site fencing. Timber post and three rail fence.
 - Boundary and internal walls. Existing boundary wall to be re-used and new squared stone blocks provided to match existing.
 - Lighting columns. 6m high tapered column with flat glass lantern, painted Forest Green.
 - Site boundary gate. Timber boarded gate.
 - Internal gates. Timber five bar gates.
 - Traffic signs to be mounted on 'Ludix' style de-formable posts.
 - Roundabout. Grassed and landscaped central island with chevron lining, vertical chevron signs and turn left arrows.
 - Roundabout splitter islands to have illuminated bollards and exit direction signs.
 - Public highway. Carriageway surfaced with bituminous materials.
 - Public highway footways. Surfaced with bituminous material.
 - CCTV camera.
 - Soft landscaping.
