## 'Madora' rear picket fence: Design & Access Statement

#### Overview

The rear garden of the property is currently fenced in a green wire 'chain link' fence. This fence was constructed by my wife's father in the early 70's when it replaced an earlier timber picket fence. There are two gates, constructed from timber in a picket design.

The green wire is rusting in several places and most of the timber fence and gate posts are rotten and in some places falling over.

Adjacent properties have timber picket fences.

### **Proposal**

The existing fence now needs replacement. It is a visual eye sore, and where rusting and falling over, is becoming a hazard to health & safety.

The planning proposal is for a timber picket fence to match the one replaced in the 70's, and also to match the neighbouring properties.

The proposed fence will follow the existing line exactly, with the replacement gates in the same positions as at present. The height will be 60cm, matching the neighbouring property exactly. The timber will remain unpainted and tanalised, again matching the neighbouring property.

Access to the rear garden of the property will remain exactly as before, as will access along the cliff path to the rear of the property.

The current fence is industrial in nature and completely out of character with both the property and the rest of the village. This proposal will return the fence to a type more in keeping with the other cottages in the area, particularly its immediate neighbours.
