Robin Hood's Bay Men's Institute

Design and Access Statement

The building is a listed building in the centre of Robin Hood's Bay Old Village Conservation Area. It is in use as a Registered Charity for quiet recreation for residents and members of the armed forces.

The main street frontage of the building is directly exposed to driving winds, rain and seaspray, which combine with sand particles to erode the sandstone frontage. Previous attempts to slow down the erosion by replacing the type of mortar to one which allows the damp and salt to leave the sandstone blocks have proved unsuccessful, because the lime mortar was not pure enough or correctly mixed. We have had a series of test methods done on small areas of the stonework to assess the best way forward.

There is no change to any part of the structure, except that several very, very, badly eroded blocks will need replacing, by similar sandstone, to maintain the structural integrity of the building.
