23rd February 2010,

Dear Sir/Madam,

I enclose details of the proposed gates for our playground.

We would like to erect gates in two places. One small gate would be at the top of the steps to the canteen and the other set of gates would be at the rear of the school building. The gates would ensure the rear area of our playground was secure for the infant children. The gates would match the gates at the main entrance to our school in appearance though they would have a different design in the oval areas. Both gates would be barely visible from the front of the school.

The large gate would measure 4m 35cm by 1m 40cm.
The smaller gate would measure 90cm by 80 cm.

I hope that this information enables our planning request to be put forward,

Yours sincerely,

Mari Palmer
