FAO Wendy Trousdale

Dear Miss Trousdale,
In reply to your letter of 11/06/10 the scale of the south elevation plan is 1 in 100,
and the scale of roof plan is 1 in 200.

The roof lights are going to sit flush with the higher point of the pan roof tile.

I hope this answers the queries but please let me know if there are any other
questions.

Yours sincerely,
Sian Smith
