

Our Ref: 2.311

13th October, 2010

TREE PROTECTION STATEMENT

1. INTRODUCTION

Current planning application is for simple conversion of an existing building. No structural changes are proposed, i.e. no plans to extend horizontally or vertically. Buildings, gardens and access are all to remain as existing, (as indicated on submitted drawings).

2. PRUNING

No pruning work will be carried out without the advise and guidance of a suitable tree expert.

In the event that any pruning work is desired, proposals will be submitted to the planning authority for their approval.

3. DELIVERIES TO SITE

As no significant extension works are proposed, all deliveries will continue on similar basis as existing. That is, small vehicles delivering small loads. Vehicles that could disturb tree branches or roots will not be permitted.

4. SURFACING

Existing access and parking arrangements are to remain.

Existing surfacing of free draining loose gravel is to remain.

Signed

R. Agar.
