Timber garage doors combine the warmth and beauty of real wood and the very best of Garador garage door engineering. There is nothing to beat natural materials and no matter whether you choose from the Solid cedar or Elizabethan range – a timber door is a sensible choice as well as an aesthetic one and with the right care and attention will last for years to come.

All Garador timber doors are manufactured with the same high degree of craftsmanship to get the best from this natural material. For example, all cedar rails have chamfered edges and boundary joints creating a neat finish. All doors are supplied with a neutralising base stain and ready for on-site finishing.

The surface finish of the timber effect GRP doors is not only different by colour but also by its underlying appearance. Some designs come in close grain which looks like carefully sanded wood, whilst wide grain has a more rustic character.
