DESIGN AND ACCESS

The proposed development consists of internal alterations with additional windows and doors affecting the external appearance.

The existing building is brick built with an external rendered finish which is painted white. Existing windows and doors are white upvc.

The proposal includes the addition of 3no windows and 1no new door all to be white upvc to match the existing profile and design. New concrete lintel heads and window cills to match existing.

There is no alteration to existing access or parking

The proposed development is sympathetic to the existing property and policy h13 of the local plan.
