

Proposed Window

1100^{mm} wide x 1050^{mm} high

NYM / 2012 / 0761 / PL

The window was made before I submitted the plan. The builders thought I would be putting one in at the cottage comes out for one at the proposed site. I was away so

was not able to tell them to wait to make it. I will be so disappointed if I am not allowed to put this in. I promise the cottage will look just the same as no one will really notice. It will make the bedroom so much nicer inside too.

There is no window in the cottage for the full
length of this wall which makes the inside
of the room so dark damp and dreary.
PLEASE let me put this small window in!
