

2012/0254

17/4/12.

Dear Sir,

Please find enclosed my application to replace a shed used for agricultural purposes at Low Warby Farm Grumble Park Lane Haveron Mines. I purchased 80 acres of land in Feb '11 and use the land and buildings as part of my main holding at Grange Farm Westdale. The shed is in very poor repair - as seen in the photos - having suffered a lot of damage in the heavy snows of the last few years. With your permission I would like to rebuild the shed in a modern steel portal kermick type roof to be used to store straw and feedstuffs produced on the farm. The only person living within 1/2 mile of the shed has indicated to me that they are in full support of my proposal - the shed being both an eye sore and sometimes dangerous with materials coming off in the wind - and I understand will write to you in due course to support my application.

Yours Sincerely
