

**HIGHWAY IMPROVEMENT WORKS**

**PROPOSED SITE LAYOUT**

**Notes**

- A01. These notes are intended to augment drawings and specifications. Where conflict of requirements exists the order of precedence shall be as shown in the specification. Otherwise the strictest provision shall govern.
  - A02. This drawing to be read in conjunction with all other relevant engineers and architects drawings.
  - A03. Drawings not to be scaled. All dimensions to be checked on site by the contractor. Any discrepancies to be notified to the Engineer and further instructions obtained before work is commenced.
  - A04. The structure is designed to be self-supporting and stable after the building is fully completed. It is the contractor's sole responsibility to determine the erection procedure and sequence and ensure that the building and its components are safe during erection. This includes the addition of whatever temporary bracing, guys or tie-downs which may be necessary, such material remaining the property of the contractor on completion, and for ensuring that the works and any adjacent properties are safe in the temporary condition.
- No part of this drawing may be reproduced, stored in a retrieval system or transmitted in any form or by any means without prior permission in writing from Alan Wood & Partners.**
