### 3. Description of the Proposal

Please describe the proposed development including any change of use:

Ruswarp Sewage Pumping Station (SPS) collects foul sewage from the properties within Ruswarp, along with pumped sewage flows from nearby Sleights and waste water from the Ruswarp water treatment works. The foul sewage is pumped into a gravity sewer system destined for Whitby Sewage Treatment Works. The Pumping Station is located between the River Esk and the B1416, with access to the compound via the existing lay-by used for slow moving vehicles approaching the level crossing on the opposite bank. The existing installation requires emergency access to be installed in order to facilitate tankers to access the site in order to remove sewage from the pumping station in the event of a mechanical failure of the pumping station. The current proposal is to install a concrete hardstanding adjacent to the SPS, replacing part of the existing grass verge.

Has the building, work or change of use already started?  Yes  No
