Notes:

- 1 Nature of View (degree of visibility): Open, Partial, None
- 2 Degree of Visual Intrusion (extent of the view that would be occupied by the development): Full, Partial, Small Amount, None
- 3 Proportion of Development Visible: Full, Most, Partial, Small Amount, None
- 4 Level of sensitivity of receptor accounting for nature of receptor (e.g. residential/PROW) and considering Nature of View/Degree of Visual Intrusion/Proportion of Development Visible and Transient/Fixed)
- 5 \*\*\*Residential component of Farm

- 2 Degree of Visual Intrusion (extent of the view that would be occupied by the development): Full, Partial, Small Amount, None
- 3 Proportion of Development Visible: Full, Most, Partial, Small Amount, None
- 4 Level of sensitivity of receptor accounting for nature of receptor (e.g. residential/PROW) and considering Nature of View/Degree of Visual Intrusion/Proportion of Development Visible and Transient/Fixed)
- 5 \*\*\*Residential component of Farm

Notes:

- 1 Nature of View (degree of visibility): Open, Partial, None
- 2 Degree of Visual Intrusion (extent of the view that would be occupied by the development): Full, Partial, Small Amount, None
- 3 Proportion of Development Visible: Full, Most, Partial, Small Amount, None
- 4 Level of sensitivity of receptor accounting for nature of receptor (e.g. residential/PROW) and considering Nature of View/Degree of Visual Intrusion/Proportion of Development Visible and Transient/Fixed)
- 5 \*\*\*Residential component of Farm
