Subject: Doves Nest noise.

Dear Wendy,

As you are having a committee meeting on 17th January please take note of the constant hum from I guess the generator at Doves Nest?
It is 22.02 on a Saturday evening and I am trying to work but the background hum from the generator is very irritating, I am writing to you are it is useless writing to York Potash.
I live here because it is quiet and I can concentrate!

I hope this is not going to be the sound of the future in my home.

Best wishes, Sue Willmington
