Subject: Comments om NYM/2013/0435/FL, South Moor Farm, Langdale End

In exercise of my delegated powers, I would confirm the Parish Council very strongly objects to this application.

It does not consider this is an appropriate proposed development for this very rural area and does little for diversification. There are other private airfields in the area (Grindale and Octon spring to mind straight away. The proposed hangar is not in keeping with local agricultural buildings - it appears to be no more than a huge metal shed. Storage of 10 aircraft could mean at least 10 take offs and landings on a busy day - this would cause considerable noise pollution. Other than the owners of the other planes which the applicant says will be able to use the hangar for storage & the pilots making use of the runway, it is hard to visualise a significant increase in the numbers of visitors to the NYMNP as a result of this proposal. No mention is made of what acreage is to be taken out of agriculture in order to accommodate this proposal, nor how the airstrips are to be managed (grazing etc). In the event of an incident, access for the emergency services will be seriously protracted due to the property's distance from the public highway. The area is also used by the RAF for low flying training (very often at below 500 feet) and as such there is an increased potential for accidents. There are footpaths and bridleways in the vicinity of the farm, and the users (both human and animal) will be affected by plane manoeuvres.

The Parish/Town Council has **no objection** to this application

The Parish/Town Council **objects** to this application
(A reason **must** be given)

Detrimental to National Park. Seems a strange way to improve a B & B business. It is the councillors opinion he is trying to get it for his own personal use instead of using Wombaton. There are already other landing strips nearby and this would increase air traffic in the National Park. The councillors all strongly object to this proposal.

The Parish/Town Council **supports** this application
