Many thanks for the amended plans Rob. However before I send them off form re-consultation I note that the proposed glass balustrade to the patio is still shown on the elevation drawing. I would be grateful if you could let me have a duly amended plan at your earliest convenience showing the proposed stone boundary wall and timber rail.

Kind regards,

Jill Bastow

Please find attached amended plans and elevations.

The glass and stainless steel balustrading has been removed from the scheme. The roof terrace has been reduced in size and pulled back from the edge of the kitchen roof to avoid any overlooking. The roof terrace is now to be hidden behind a slate tiled mansard roof to the kitchen with a stone parapet wall with a hardwood rail to the top supported on short galvanised steel posts/brackets. There is to be a stone upstand to the open edge of the tiling with a stone capping to reflect the main house roof.

The boundary wall to the patio has also had the glass and stainless steel balustrading removed, to be replaced by a stone wall with the same timber rail with galvanised support brackets on top. The existing wall needs to be raised in height as it is currently too low and dangerous and the timber rail will deter anyone from sitting on top of the wall which is also dangerous as there is a drop the other side.

We hope you feel that these proposals are a satisfactory improvement.

Regards,

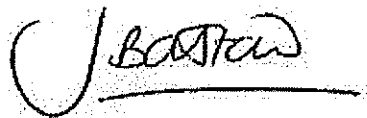

Rob
